

Renaissance Academy

2760 Fieldstone Rd. • Colorado Springs 80919
(719) 475-2510 • www.therenaissanceacademy.org

Renaissance Academy is a private school with a gifted education program that serves children from preschool-eighth grade. Founded in 1993, our NCA (North Central Association) accredited school creates an experiential, loving, analysis-oriented, and intellectually stimulating environment that invites students into a process of self-discovery. The school provides a superior, well-rounded education that maximizes each child's academic potential, develops their special gifts, and gives them the life skills necessary for success. The 13:1 student teacher ratio fosters close relationships and provides for individual attention, and multi-age classrooms create an environment that is non-competitive and establishes trust and respect amongst students and teachers. The active curriculum includes hands-on learning and frequent field trips, and allows students to apply their knowledge to real-life situations. The interdisciplinary approach demonstrates relationships throughout content areas. Students receive instruction in Computer Education, Art and Drama, Spanish and Physical Education. There is an environmental education summer program from June-August

Renaissance Academy is situated in a foothill setting that provides a beautiful atmosphere for learning.

Pre-Schools & Child Care

Directory of Pre-Schools & Child Care Facilities

Today's working parents can choose from a variety of day care arrangements, from home day care to in-home care, child care centers, and work-site child care. Day care centers and licensed day care homes are subject to regulations established by the Colorado State Department of Social Services. Each home day care provider is required to attend training courses that teach child growth and development, first aid, infant/child CPR, child management and nutrition. All homes must meet certain safety standards, and providers are encouraged to conduct their day care home in a businesslike manner.

Additionally, a child abuse and background check are completed on every person 18 years or older who lives or works in a home providing child care. Smoking is not allowed while children are present.

Day care centers have additional requirements including group size, child to staff ratios and staff qualifications.
